MY FIVE XERO *Hacks*

Hello, I'm Sarah Groth, an experienced bookkeeper based in Adelaide Australia, and I help female entrepreneurs focus on the parts of their business they love, and leave the time-draining and overwhelming finances to us.

I do this through my Xero to Hero Bookkeeping Method delivered through my private bookkeeping services and Bookkeeping Health Check calls so that you can grow your business without worrying about your bookkeeping.

My 5 Xero Hacks to Save 6 Hours a Week is the culmination of streamlining dozens of businesses with Xero and recognising that there are so many time-saving tools and quick wins that most entrepreneurs aren't aware of.

Without these hacks, you'll waste time and feel confused by your finances as you worry about ATO compliance and whether your books are under control.

With them, you'll be able to save 6 hours a week that you'd typically spend on bookkeeping or accounting and instead dedicate that to growing your business, or heck, enjoying more of life!

Enjoy!

x

Sarah

DOERSFINANCE

Online courses are an incredible opportunity to take your business to the next level! They allow you to STOP trading time for money working in a manual or service based business, where your time and income is capped.

You are able to share your message, your "Genius Zone", with the world, operate 24/7, and gain loyal customers around the world without going anywhere!

So many women have been thinking about building an online program but don't know where to start or get overwhelmed with fear or perfectionism halfway through.

But, whether you're creating a course for the first time, or are transferring your manual face-to-face business to an online platform - these simple steps will help you to get clarity, implement efficient systems, and be operating online in no time!

1

SAVE RECEIPTS

ReceiptBank is a tool that was founded in 2010 out of frustration from the amount of time and money lost in forgotten expenses, lost receipts and weekends spent sorting through paperwork.

The founders decided there must be a better way to track business expenses and share them with your accountant.

150 million receipts, bills and bank statements later, Receipt Bank now allows business owners to submit their receipts by taking quick photos on their phones and automatically assigning them to different categories. This makes receipt collecting FAST to stay ATO compliant, and saves you hours in reconciling your books each week.

2

PAY YOUR STAFF IN UNDER 4 MINUTES

Xero now integrates with the ATO for automated superannuation payments and reporting to make your life as a business owner even easier.

Each quarter, you are required to run the superannuation report and with Xero, this can be done in less than 15 seconds as it reviews your payroll over the quarter and figures out exactly how much each staff member is owed.

With just a couple of clicks, you can then lodge the superannuation statement with the ATO and after receiving a verification text, this can then send the funds directly to the superannuation accounts.

The days of manual payments are gone and a whole world of automation awaits with this cool Xero hack :-)

3

AUTOMATED INVOICE REMINDERS

Chasing unpaid debts and accounts receivables is one of the most time wasting tasks for a female entrepreneur. Here are Doers Finance, we love implementing automated invoice reminders to chase our client's funds automatically.

This feature saves time and helps your cash flow too. Businesses get paid faster, but it's difficult to find time to chase overdue invoices, or have those sensitive "money" discussions.

An exceptional customer experience is vital to retaining your customers. And **CLARITY** is key!

Whether it be simple visual communication and layout or the details of your course T&C's. customers MUST be able to **EASILY** follow your program... and trust you 100%

THE TWO REPORTS ALL FOUNDERS SHOULD CHECK EACH WEEK

As a busy entrepreneur, you need to be able to quickly get financial information about your business and make decisions that will help you invest wisely and grow.

The two most important reports you should be checking weekly can be displayed easily on your dashboard for a quick health check of the business. These reports are your Profit and Loss Statement and your Cash Flow report.

With the click of a few buttons, your reports can be displayed on your dashboard with actual dollar amounts, line graphs or pie charts so you can get a visual representation of what's happening and confidently make decisions for growth!

5

BANK RULES

If you deal with cash transactions or don't enter all transactions in Xero before you import bank statements, set up bank rules. Bank rules are a quicker and easier way to reconcile imported bank statements.

You set up the rules to match your imported statement lines. After you import a bank statement and go to reconcile your account, your rules run. For each bank transaction that matches a rule, Xero creates a transaction based on the rules you've set.

If the transaction Xero creates based on the rule is wrong, you can edit it, create a new one or find a transaction you've already entered into Xero to match with your statement line. It's powerful, and saves hours.

MY FIVE XERO *Hacks*

But, unless you understand what each of the automation steps mean and the way to apply them, it'll only remain an under-utilised tool that sits in your toolbox.

It is like having the keys to a gorgeous car but not knowing how to drive it.

So, if you'd like to use these hacks to their fullest potential, I want to show you how, through a private Bookkeeping Health Check Call where, together we'll deep dive into exactly where you're wasting time and getting stuck in Xero and design a tailored game plan to get your hands off the keyboard fast.

In this call, I'll be showing you how you can focus more on the things you love and are best at, and stop spending frustrating hours on these time-draining finance tasks. You are in possession of a tool that can get you massive results when implemented correctly
